

HOW TO INTERVIEW A SCIENTIST!

1 Find a Scientist!

.....
Scientists are all around us.
Your doctor or veterinarian
counts, too!

6

Thank the Scientist

Make sure they know
you appreciate their
time! Then save your
recording.

2

Write Questions

A few ideas to get started:

How did you get interested in
what you study?

What's the most interesting
thing you've learned?

Why do you think people should
know and care about what you
study?

5

Ask Your Questions

If you don't understand the
answers or the words,
don't be afraid to ask scientists:

"What do you mean by that?"

4

Introduce Yourself!

Say your name, and let the scientist
know why you're interested in
talking to them.

3

Set up to Record

Use Voice Memo on an iPhone,
download Voice Recorder on Android,
or take a video!

Send Your Interview to Tumble!

We're looking for interviews to feature on our podcast!
